CHAIRMAN'S INTRODUCTION vii

PROGRAMME CHAIRMAN'S INTRODUCTION ix

PROGRAMME COMMITTEE xi

REVIEWERS xi

SESSION CHAIRPERSONS xii

K1: OPENING AND KEYNOTE SESSION 1
Chairman: Friedrich Winkelhage

Object-Oriented Programming as a Design Methodology
Gerhard Goos 1*

K2: KEYNOTE SESSION 3
Chairwoman: MariaGiovanna Sami

Design Tools for Connectionist Systems
J.A. Feldman 3

K3: KEYNOTE SESSION 5
Chairman: Lutz Richter

Methodology for the 90's
Michael Jackson 7

A1 - SOFTWARE ENGINEERING: Databases I 17
Chairman: M. Papazoglou

Microcomputer Implementations of an Object-Oriented, Multiprocessing Database Programming Language
J.G. Hughes 19

Database Support for the PROTOS-L System
S. Böttcher, C. Beierle 25

An Object-Manager for Handling Persistent Data in Modula-2
M. Ancona, L. Giardina, M.E. Rollero 31

A2 - ADVANCED APPLICATIONS: Robotics and Automation 37
Chairman: J. Billingsley

Synthesis of an Intelligent Environment for Object Recognition Using Tactile Data
F. Contreiras, H. Avril, D. Wilson, S. Winter 39

Stochastic Force Sensing Application in Robotics
B.L. Luk, F. Naghdy, J. Billingsley 47

Software Design of Distributed Single-axis Motion Controllers for Industrial Applications
J. Pu, R. Harrison, R.H. Weston, P.R. Moore 53

A3 - TOOLS AND METHODOLOGIES: Artificial Intelligence for VLSI 61
Chairman: J. Mølgaard

A Methodology for Structural and Behavioural Understanding of Digital Systems
R. Parihar, P. Dasiewicz 63

Partitioning of Digital Designs: a Knowledge Based Approach and Concepts for its Parallelization
M. Hulin, J. Heistermann 69

A Knowledge-Based Approach to VLSI Design in an Open CAD-Environment
L. Alberts, C. Huijs, N. Mars, L. Spaanenburg 77

A4 - ARCHITECTURES: RISC Architectures 85
Chairman: D. Tabak

Reduced Instruction Buffer for RISC Architectures
T. Jové , J. Cortadella 87

Inter: an Inexpensive Inter-Procedural Register Allocator
J.M. Mulder 95

Architecture Design of a RISC-Processor for Prolog
P. Deussen, W. Rosenstiel, K.E. Schauser, J. Wedeck 101

A5 - SHORT NOTES I 109
Chairman: Stephen Winter

B1 - SOFTWARE ENGINEERING: Databases II 111
Chairman: M. Papazoglou

On Integrating Database Modeling Constructs for Software Engineering Databases
M. Papazoglou, L. Marinos 113

A Construction Database Model
I. Savnik, F. Novak 121

A New Approach Towards an Object-Oriented Database System
S. Goutas, P. Soupos, D. Christodoulakis 127

B2 - ADVANCED APPLICATIONS: Vision and Image Analysis 133
Chairman: M.J. Taylor

A Comparison of Frameworks for Cooperation in Distributed Image Registration Systems
S. Flavell, S. Winter, D. Wilson, P. Fernin 135

Transputer Based Digital Signal Processing Unit for a 3-D Vision System
P. Jokitalo, E. Honkanen, I. Kaisto, I. Moring, H. Palo, K. Rautiola 143

Efficient Parallel Implementation of the Hough Transform on a Distributed Memory System
D. Ben-Tzvi, M.B. Sandler 147

B3 - TOOLS AND METHODOLOGIES: Formal Methods I 153
Chairman: J. De Man

Syntactic and Semantic Aspects of Formal System Description
R. Boute 155

Formal Hardware Specification and Verification Using Prolog
Z. Brezočnik, B. Horvat 163

Systolic Array Description in P^2
P. Camurati, T. Margaria, P. Prinetto 171

B4 - ARCHITECTURES: Using Neural Networks 179
Chairman: R. Brause

A Declarative Neural Network Description Language
T. Korb, A. Zell 181

Structure and Application of NNSIM: a General-Purpose Neural Network SIMulator
J. Nijhuis, L. Spaanenburg, F. Warkowski 189

B5 - SHORT NOTES II 195
Chairman: Stephen Winter

C1 - SOFTWARE ENGINEERING: Tools for Distributed System Design I 197
Chairman: D. Fay

Tools for Distributed Programming in the INCAS Project
P. Buhler, D. Wybranietz 199

PARLE: a Language for Expressing Parallelism and Integrating Symbolic and Numeric Computations
E. Eberbach, S.C. McCabe, A.N. Refenes 207

MEX, a Programming Language that Supports Discrete Event Simulation
M. O'Dowd 215

Distributed System Design Using Ada as a Tool for Prototyping
A.M. Levy, A.J. van de Goor, J. van Katwijk 221

C2 - ADVANCED APPLICATIONS: Real-time Hardware and Applications 231
Chairman: J. Karjalainen

A Fault Tolerant Control Computer for the ASPERA Plasma Instrument of Phobos Spacecraft
E. Strömmer 233

SW/HW-Partitioning of Real-Time Embedded Systems
J.P. Soininen, M. Sipola, K. Tiensyrjä 239

On the Design of a Real-Time Digital Median Filter
J. Dodrill, N. Kanopoulos 245

Hardware Support for the TUMULT Real-Time Scheduler
H. Van der Bij, G. Smit, P. Havinga 251

C3 - TOOLS AND METHODOLOGIES: Formal Methods II 259
Chairman: R. T. Boute

Application of System Semantics to VLSI for the Transformational Design of a Parameterized Booth Multiplier Module - a case study
L. Claesen, R.T. Boute, J. De Man, W. Ploegaerts, M. Seutter, J. Vanslembrouck, D. Verkest 261

Glass, a Language for Analog and Digital Circuit Description, and its Environment
R. Oolman, M. Seutter, C. van Reeuwijk 267

Transformational Design of Digital Circuits
J. De Man, J. Vanslembrouck 273

Description and Verification of More-Dimensional Regular and non-Homogeneous Structures using a Functional Hardware Description Language
W. Ploegaerts, D. Verkest, L. Claesen, H. De Man 279

C4 - ARCHITECTURES: Dedicated Architectures 287
Chairman: H. Painke

MVM: a GaAs Microprocessor for Critical Real-Time Applications
A. Nuñez, D. Carnal 289

A DBT-Based VLSI Systolic Architecture
for Hard Squared Error Clustering
E.L. Zapata, R. Doallo, S. Barro 299

NL1 Machine - a Concept of a High Performance
Data Type Architecture
E. Pissaloux, L. Nolin 307

Synchronous Dataflow-Based Architecture
J. Šilc, B. Robič 315

C5 - SHORT NOTES III 323
Chairman: Stephen Winter

D1 - SOFTWARE ENGINEERING: Tools for Distributed System Design II 325
Chairman: D. Fay

A Software Engineering Environment
for Distributed Applications
M. Mühlhäuser, A. Schill, J. Kienhöfer, H. Frank, L. Heuser 327

DIPROTALK: a Tool for Object-Oriented Design
of Distributed Applications
A. Petkov, T. Tzonev 333

Parallel Object System Support on Transputer-Based Architectures
A. Ciampolini, A. Corradi, L. Leonardi 339

D2 - WORKSTATIONS: Subsystems for Future Workstations 347
Chairman: N. Scarabottolo

32-bit Microprocessor Architectures and Extended Abstract Machines
for High Level Languages
M. Ancona, A. Clematis, V. Gianuzzi 349

A Coprocessor for Implementing the LISP-Dialect SCHEME
J. Lohse, R. Rauscher, B. Schütz 355

A Design of Microcomputer Speech Output Device
Lin Wei, Du Yi-Ren, Li Zhi-Zhu 363*

D3 - TOOLS AND METHODOLOGIES: Synthesis I 365
Chairman: A. Pawlak

MSYN: Automatic Synthesis of Hardware
I. Causarano, R. Guizzetti, M. Pipponzi, F. Somenzi 367

A Framework for the Synthesis of Hardware from Occam
R. Dowsing, R. Elliott, M. Templeton, G. Williams, F. Woodhams 373

Improving the Performance of High-Level Synthesis
P. Marwedel, W. Schenk 381

D4 - ARCHITECTURES: Parallel Architectures I 389
Chairwoman: A. Antola

Prolog: a New Parallel Evaluation Scheme
I. Hannequin, G. Goncalves, M. Lecouffe, B. Toursel 391

Performance of OPS5 Matching on CUPID
M.A. Kelly, R.E. Seviora 397

A Flexible Transputer Network for Numerical Applications
J. Luo, F. Bruggeman, G.L. Reijns 405

D5 - SHORT NOTES IV 413
Chairman: Stephen Winter

E1 - SOFTWARE ENGINEERING: Tools for Distributed System Design III 415
Chairman: D. Fay

An Environment for Developing Concurrent Software
for Transputer-based Image Processing
D. Crookes, P. Morrow, B. Sharif, I. Mc Clatchey 417

A High-Level Coordinator in a Distributed File-Store Architecture
M.J. Santana, E.J. Zaluska 423

A Protocol for Resource Locking and Deadlock Detection
in a Multi-user Environment
A. Domenici, B. Lazzerini, C.A. Prete 431

E2 - WORKSTATIONS: Workstation Networking 439
Chairman: H. Schumny

The Use of an Office Information Server
in an Environment based on High-Performance Workstations
M.D. Beer 441

Structure and Performances of a Campus-Wide
IBM Token Ring Multi-Network
P. Della Vigna, P. Faverio, F. Macchiavello,
F. Mercalli, N. Scarabottolo, G. Tormene 447

An Automatic Distributed Calendar and Appointment System
F. Mattern, P. Sturm 455

E3 - TOOLS AND METHODOLOGIES: Synthesis II 463
Chairman: A. Pawlak

Synthesis of Control Units in a Design Environment
for Chip Architecture
J. Gessner, T. Bergstraesser, S. Wallstab 465

Automated Synthesis of Structural HDL Descriptions
from Graphic Specification of Embedded ASICs
A. Reinikka, A. Auer, A. Okkonen 473

Synthesis of Systolic Architectures Using the SYS^3 System
R.W. Hartenstein, K. Lemmert, M. Riedmuller 479

E4 - ARCHITECTURES: Parallel Architectures II 487
Chairman: E.L. Zapata

Highly Parallel Distributed Computing Systems
with Optical Interconnections
J. Just, R. Romaniuk 489

Floating Point Acceleration in Massively Parallel Architectures
M. Maresca, A. Frisiani, T. Vernazza 495

A Parallel Markovian Model Reliability Algorithm
for Hypercube Networks
E.L. Zapata, J.D. Bruguera, O.G. Plata, F.F. Rivera 501

E5 - SHORT NOTES V 509
Chairman: Stephen Winter

F1 - SOFTWARE ENGINEERING: Software Aspects in Real-time Systems 511
Chairman: H. Rzehak

SOKRATES-SA: a Formal Method for Specifying Real-Time Systems
A. Okkonen, A. Auer, M. Levanto, J. Okkonen, J. Kalaoja 513

Conversation Modules: a Methodological Approach
to the Design of Real-Time Applications
M. Collado, R. Morales, J. Moreno 521

A D-Graph Based Approach for Verifying Response Time
of "Critical" Programs
G. Cantone, A. Esposito 527

Real-Time UNIX Operating System: RX-UX 832
Y. Mizuhashi, M. Teramoto 533

F2 - ADVANCED APPLICATIONS: Computer Music 539
Chairman: G. Haus

Temporal Logic Issues in Music Knowledge Representation
A. Camurri 541

Coping with some really Rotten Problems
in Automatic Music Recognition
A.T. Clarke, B.M. Brown, M.P. Thorne 547

Music Synthesis Description with the Data Flow Language LUSTRE
P. Amblard, H.P. Charles 551

High Complexity Resonator Structures for Formant Synthesis
of Musical Instruments
M.B. Sandler 557

F3 - TOOLS AND METHODOLOGIES: Hardware Development Tools 563
Chairman: K. Waldschmidt

Characteristics and Requirements of Semi-Custom Design Tools
W. Haas, M. Beunder, J. Kernhof 565

PMLS - a Parallel Multi-Level VLSI Simulator
E. Aposporidis, F. Lohnert, P. Mehring, F. Hoppe, H.U. Post 571

An Integrated Development System for the MC68705
Single Chip Computer
P. Nylén 579

Languages and Tools for the Graphical and Textual
System-Independent Programming of Programmable Logic Controllers
W.A. Halang 583

F4 - ARCHITECTURES: Microprogramming 591
Chairman: A. Nuñez

Microprogrammed Implementation of a Reduction Machine
J. Muylaert Filho, E. Tavares Fernandes 593

A High Speed Prolog Implementation on a VLIW Processor
W. Schenk 601

Verification Oriented Approach to Concurrent Microprogramming
with the Language C-MIDDLE
M. Gondzio 607

IMISSED: Interactive Microprocessor Instruction Set
Simulation Environment with Graphical Display
E. Dirkx 619

F5 - SHORT NOTES VI 623
Chairman: Stephen Winter

G1 - SOFTWARE ENGINEERING: Software Development Tools 625
Chairman: H.J.M. Decuypere

A Graphics-Only Programming Tool
U. Schult 627

Process Programming Using Graphical Objects
T. Hiller 633

A Reuse Base for Real-Time Software Specifications
T. Ihme 639

G2 - ADVANCED APPLICATIONS: Real-time Systems I 647
Chairman: A.D. Stoyenco

Mechanizing the Verification of Real-Time Discrete Systems
J.S. Ostroff 649

Algorithms and Complexity of the Periodic Maintenance Problem
A. Mok, L. Rosier, I. Tulchinsky, D. Varvel 657

Non-Invasive Testing of Real-Time Avionic μ-Processor Systems
M.A. Suchenek, X. Zheng, G. Sarwar 665

G3 - TOOLS AND METHODOLOGIES: Testing 673
Chairman: F. Distante

Explicit Fault Modeling and Hierachical Test Pattern Generation in the KARATE System
G. Alfs, R.W. Hartenstein, A.Wodtko 675

Testability of Non-Trivial CMOS Faults under Realistic Conditions
H. Vierhaus 681

Data Exchange Formats for Testing
J. Pfeifer, M. Wahl, H. Wojtkowiak 687

G4 - ARCHITECTURES: Fault Tolerance 695
Chairman: M. Dal Cin

Optimum Design of Fault-Tolerant Arithmetic Array Processors by Using Data Coding
V. Piuri 697

The Fault-Tolerant Architecture of the SAFE System
H. Madeira, B. Fernandes, M. Rela, J. Silva 705

PUMA: Hardware Support for Fault-Tolerance and Object-Oriented Programming
C. Vogt, K. v.d. Heide 713

G5 - ADVANCED APPLICATIONS: Transputer Systems and Applications 721
Chairman: J. Tiberghien

Parallel Processing in Machine Automation
K. Rautiola, T. Näyhä, K. Kaarela 723

Acceleration of Circuit Simulation on a Parallel Transputer Workstation
T. Reus 731

TLS: a System for Building and Controlling Transputer Networks
M. van Peursem, P. Knoppers, A. van de Goor 739

H1 - SOFTWARE ENGINEERING: Expert Systems 747
Chairman: H.J.M. Decuypere

NETPLAN: a Rule Based System to Design
Packet Switching Data Networks
M. Annunziata, G. Decarlini, C. Malaponti 749

Expert System Design for Symptom-Based Diagnosis
in Local Area Networks
P. Marino, R. Maxion 757

H2 - ADVANCED APPLICATIONS: Real-time Systems II 765
Chairman: W.A. Halang

Scheduling Imprecise Computations to Minimize Total Error
J.Y. Chung, W.K. Shih, J.W.S. Liu, D.W. Gillies 767

Real-Time Scheduling with both Preemption
and Nonpreemption Requirements
X. Yuan, A.K. Agrawala 775

H3 - TOOLS AND METHODOLOGIES: Dedicated VLSI Architectures 783
Chairman: K. Waldschmidt

On Structured Gate Forest VLSI Design
G. Roos, J. Leenstra, T. Schwederski, L. Spaanenburg,
B. Hoefflinger 785

Some Proposals for VLSI Implementation of Digital PID Controllers
with some Fault-Tolerance Capabilities
G. Storti Gajani 793

H4 - ARCHITECTURES: Fault Diagnosis 797
Chairman: E. von Puttkamer

On Location of Faults with Propagation
to within a Set of Bounded Size
K. Huang 799*

Performance Evaluation of a New Design Tool
for Microprocessor Transient Fault Recovery
G. Wingate, C. Preece 801

H5 - ADVANCED APPLICATIONS: Education 809
Chairman: V. Piuri

DUNIX: Distributed Operating Systems Education via Experimentation
O. Frieder, A. Litman, M. Segal 811

EDULAN: a Tool for Teaching Synchronization
K. De Bosschere 819

SESSION CHAIRPERSONS' ADDRESSES 827

AUTHORS' ADDRESSES 831

SUBJECT INDEX 841

AUTHOR INDEX 845
